DETAILED ACTION

1. This action is Election/Restriction.
2. Claims 1-4 are pending in this action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 4, drawn to mobile communication controller, classified in class 455, subclass 560.
- II. Claim 2, drawn to base station detail, classified in class 455, subclass 561.
- III. Claim 3, drawn to radiotelephone equipment detail, classified in class 455, subclass 550.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a data rate change in a mobile communication controller has a separate utility like balancing/controlling base stations' traffic load. In the same manner base stations with rate change (dynamic rate) may or can be used to manage the traffic load in the region they control without needing mobile stations to have rate change/s. Because these inventions are distinct for the reasons

given above and the search required for Group I and/or II is not required for Group III, restriction for examination purposes as indicated is proper.
